

Kindle Agent - UI/UX Design Document

1. Design Philosophy

The application should hide technical complexity from users.

Users should think:

"Upload PDF → Receive Kindle File"

rather than:

"Run OCR → Convert EPUB → Convert AZW3"

2. Primary User Flow

Landing Page ↓ Upload PDF ↓ Agent Processing ↓ Review Metadata ↓ Generate Kindle File ↓ Download Output

3. Screen 1 - Home Page

Components:

- Application Logo
- Project Title
- Short Description
- Upload Area

Layout:

Kindle Agent

Convert PDFs into Kindle-ready ebooks using AI

[Drag & Drop PDF Here]

[Upload PDF]

4. Screen 2 - Processing View

After upload:

Analyzing Document...

✓ PDF Uploaded ✓ Document Analysis ⌚ OCR Processing ⌚ Format Conversion

Estimated Time: 45 seconds

Purpose:

Provide transparency into agent decisions.

5. Screen 3 - Metadata Review

Display:

Title: [Effective Python]

Author: [Brett Slatkin]

Category: [Programming]

Output Format: [AZW3]

[Continue]

Purpose:

Allow users to correct extracted metadata.

6. Screen 4 - Results

Conversion Complete

Output: effective_python.azw3

[Download]

[Convert Another File]

7. Future UI Features

- Conversion history
- Dark mode
- Multiple file upload
- Kindle email delivery
- Progress logs
- Tool execution trace
